

Dear FCC, Admittedly, I do not know all the details about this situation but, I don't like what I have heard so far. I hope you will oppose the NAB's petition 04-160. I travel often for work via my automobile and I listen to XM Satellite Radio on a regular basis. It is a wonderful alternative to conventional radio for me because I cover the entire state of Texas and it is almost impossible for me to listen to a conventional radio station for longer than an hour or two. I imagine Clear Channel Communication is one of the companies behind this. Please do not allow them (if they are involved) or any other company to deny the American public access to new and beneficial radio services. This is the USA. Fair competition is what keeps our country running.

Sincerely, Stewart Hunt
